

Note by Chad Oliver describing the use of Earl's thesis material for the Oliver & Stephens publication.

March 1975
C. D. Oliver Notes

E. P. Stephens' Data

This data has been looked over and attacked in three ways:

- 1) Much of his data has been put on computer cards; the cards are in the vault. The keys to the cards and their raw data is in the notebooks in Stephen's file.
- 2) Some of Stephens' data was used in Chad Oliver's thesis, a copy of which is at the Harvard Forest (or will be soon). The raw data worked up (but not bound in the thesis) is attached.
- 3) Much of the data has been worked up for a paper I'm now preparing. I have some data I've generated (but none of his original data) with me and will send it when I've completed it.

P.S.: Dr. Stephens sent me a letter giving me full permission to use his data as I like.
