

Harvard Forest Data Archive HF003-08

Data File:

Name = hf003-08-fall-mean-spp.csv

Description = mean fall dates (species)

Rows = 673 Columns = 6

MD5 checksum = e975589900bf5816224ceff675b34680

Variables:

year = year

lc.doy = mean day of year on which 50% of the leaves have changed
color on individuals of this species (nominalDay)

lf.doy = mean day of year on which 50% of the leaves have fallen
from individuals of this species (nominalDay)

sd.lc.doy = standard deviation of mean day of year on which 50% of
the leaves have changed color on individuals of this species
(nominalDay)

sd.lf.doy = standard deviation of mean day of year on which 50% of
the leaves have fallen from individuals of this species (nominalDay)

Variable	Min	Median	Mean	Max	NAs
year	1991.000	2001.000	2003.556	2023.000	0
lc.doy	249.000	280.000	279.756	304.000	12
lf.doy	252.000	289.000	289.854	317.000	3
sd.lc.doy	0.000	4.766	5.641	33.676	18
sd.lf.doy	0.000	5.085	5.978	29.882	8
