

Harvard Forest Data Archive HF120-03

Data File:

Name = hf120-03-birch.csv

Description = birch

Rows = 114 Columns = 4

MD5 checksum = ec6cb78715f10c10ba35be143777f3cd

Variables:

date = date when we collected seeds off of seed traps

distance = distance in meters of placement of seed trap along
transect. Zero meters was at the
western edge of the Hemlock Removal

Experiment plot 3. The transect extended east
through plot 3 til the

eastern edge of the Hemlock Removal Experiment plot 2. (meter)
seeds = number of seeds collected from a trap on a particular date
(number)

Variable	Min	Median	Mean	Max	NAs
date	2005-10-30	2005-11-06	2005-11-06	2005-11-13	0
distance	0.000	90.000	90.000	180.000	0
seeds	0.000	0.000	0.132	2.000	0
