Harvard Forest Data Archive HF162-09

Data File:

Name = hf162-09-stumps.csv
Description = stumps
Rows = 1599 Columns = 9
MD5 checksum = ab5ab72b325c73daff311718532524bd

Variables:

year = year sampled; post-harvest only
diam1 = stump diameter (centimeter)
diam2 = second diameter in cm. measured perpendicular to the first
    if possible. Not measured in 2010 (centimeter)
height = stump height; listed as negative for hollows as this is
    negative space to be subtracted from the plot volume (meter)

Variable	Min	Median	Mean	Max	NAs
year	2010.000	2017.000	2015.745	2022.000	0
diam1	7.700	32.000	31.930	75.000	18
diam2	5.000	32.000	31.795	72.500	350
height	−0.400	0.200	0.226	3.400	18
