

Harvard Forest Data Archive HF204-01

Data File:

Name = hf204-01-RCPs.csv

Description = twenty RCPs

Rows = 20 Columns = 57

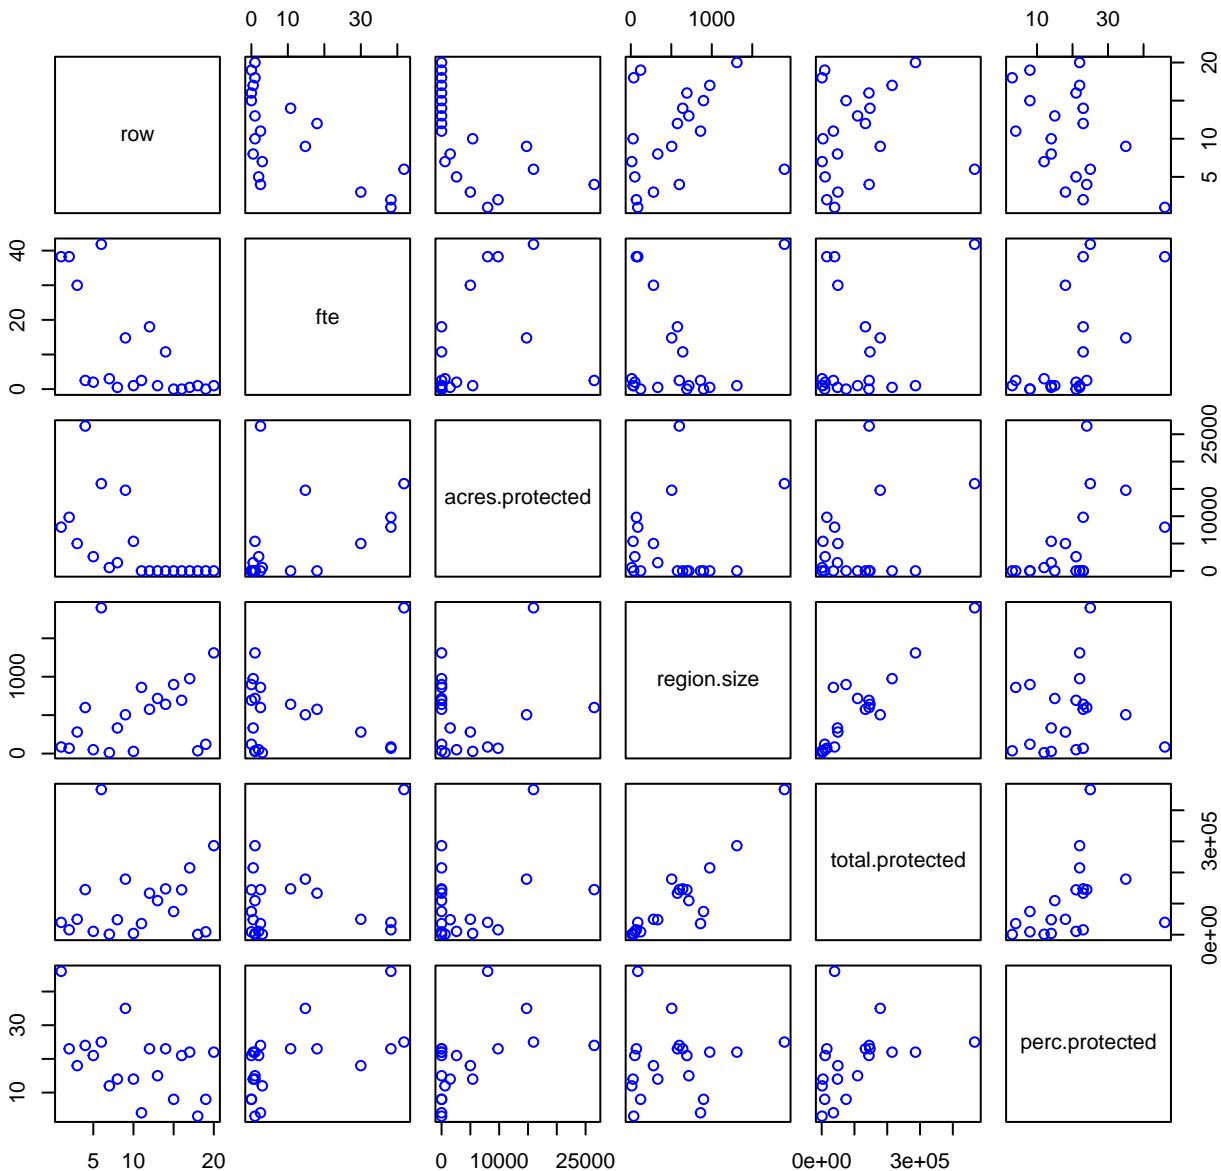

MD5 checksum = 70e3420047c87edda124dc942db7623e

Variables:

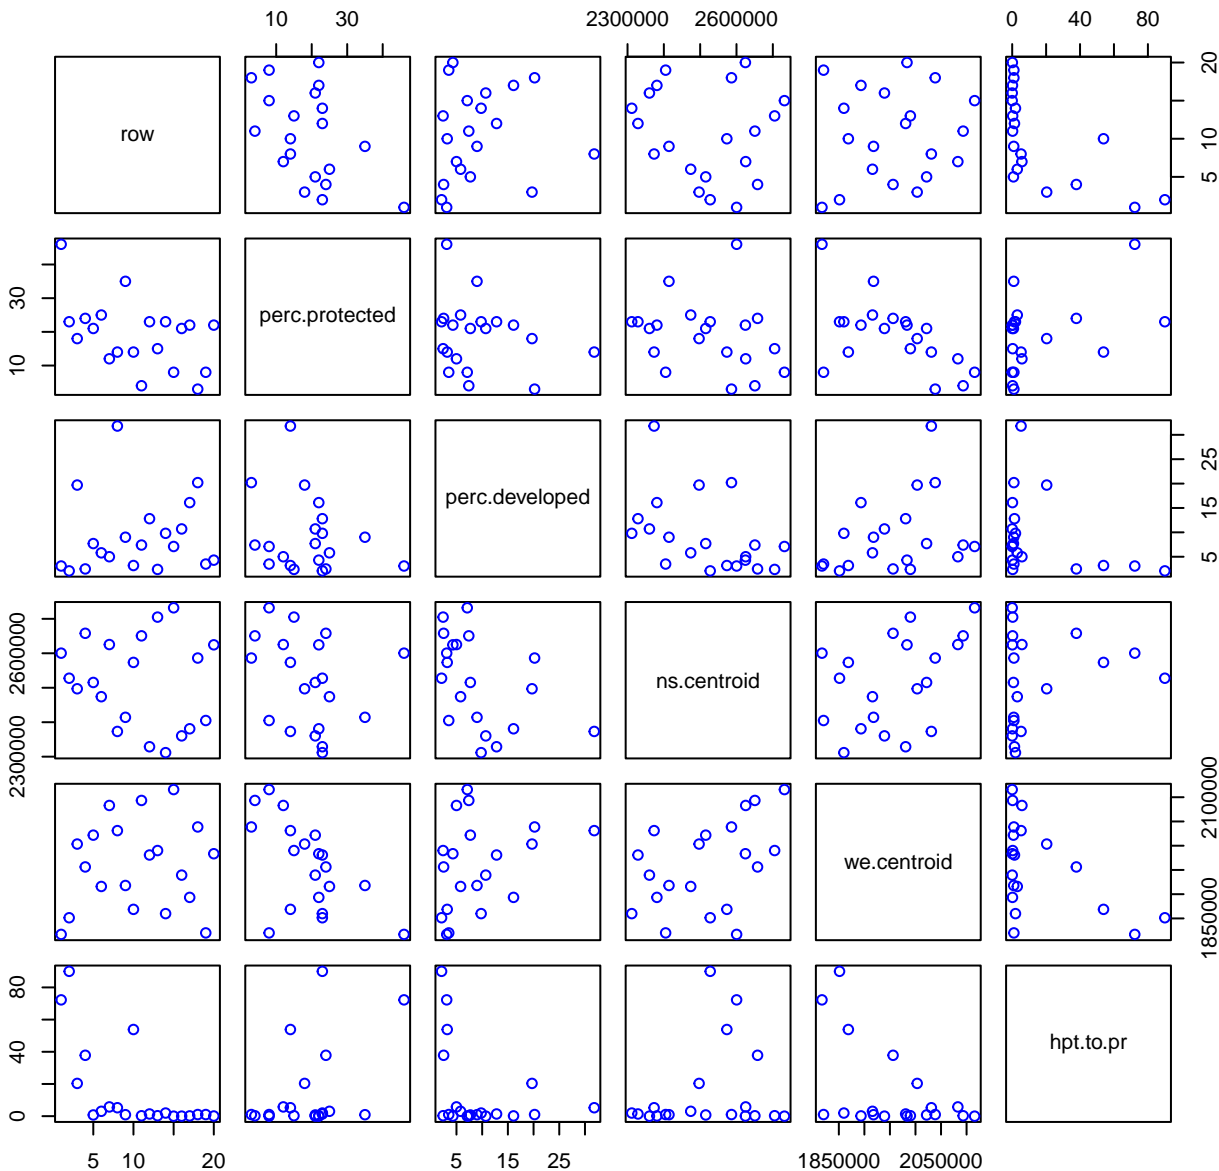

fte = full-time equivalent positions of the host partner organization in 2009 (number)
acres.protected = number of acres protected by RCP (number)
region.size = size of the partnership region in thousands of acres (acre)
total.protected = total number of acres protected in the partnership region (acre)
perc.protected = percentage of region protected from development (dimensionless)
perc.developed = percentage of region in development (dimensionless)
ns.centroid = North to South centroid of region (meter)
we.centroid = West to East centroid of region (meter)
hpt.to.pr = ratio of the host partner territory to the partnership region (dimensionless)
num.lts = number of land trusts who are partners in the region (number)
num.partners = number of partners in the region (number)
num.cons.orgs = number of statewide conservation organization who are partners in the region (number)
num.h20.orgs = number of watershed association organizations who are partners in the region (number)
num.munic = number of municipalities in the region (number)
rcp.age = age of RCP (nominalYear)
acres.protected.yrly = acres protected per year by RCP (acre)
mill.raised = millions of dollars raised by RCP (number)
age.lpstart = age of RCP when land protection started, or age of RCP in 2009 if no land had been protected by then (nominalYear)
num.states = number of states in the region (number)

Variable	Min	Median	Mean	Max	NAs
fte	0.000	2.250	10.344	41.830	0
