

Harvard Forest Data Archive HF252-01

Data File:

Name = hf252-01-short-survey.csv

Description = short survey

Rows = 271 Columns = 72

MD5 checksum = 274e525339e4c0840fa081cc08cf1953

Variables:

no.days = number of days elapsed between when the survey was sent,
and when it was

returned. This is useful for investigating the
potential of non-response
bias. (number)

year.acquired = year the property was acquired by the current owner

acres = number of acres of the property owned by the
respondent
(acre)

year.born = year of respondent's birth

Variable	Min	Median	Mean	Max	NAs
no.days	4.000	18.000	19.930	199.000	0
year.acquire	1950.000	1990.000	1988.659	2009.000	16
acres	10.000	26.000	58.694	800.000	3
year.born	1916.000	1950.000	1949.020	1985.000	15
