

Harvard Forest Data Archive HF287-05

Data File:

Name = hf287-05-odonates.csv

Description = dragonfly and damselfly observation data

Rows = 13 Columns = 13

MD5 checksum = d50ca6e01f4e5cbcc43f4f30100d61be

Variables:

date = date of observation

licy = number of Spangled Skimmer observed. Values of NA in all

observation data indicates that the species was present, but no number was

recorded. (number)

sysp = number of Meadowhawk sp. observed (number)

cesp = number of Pennant sp. (female) observed (number)

ceep = number of Halloween Pennant observed (number)

moda = number of "Mosaic" darner observed (number)

ersi = number of Eastern Pondhawk observed (number)

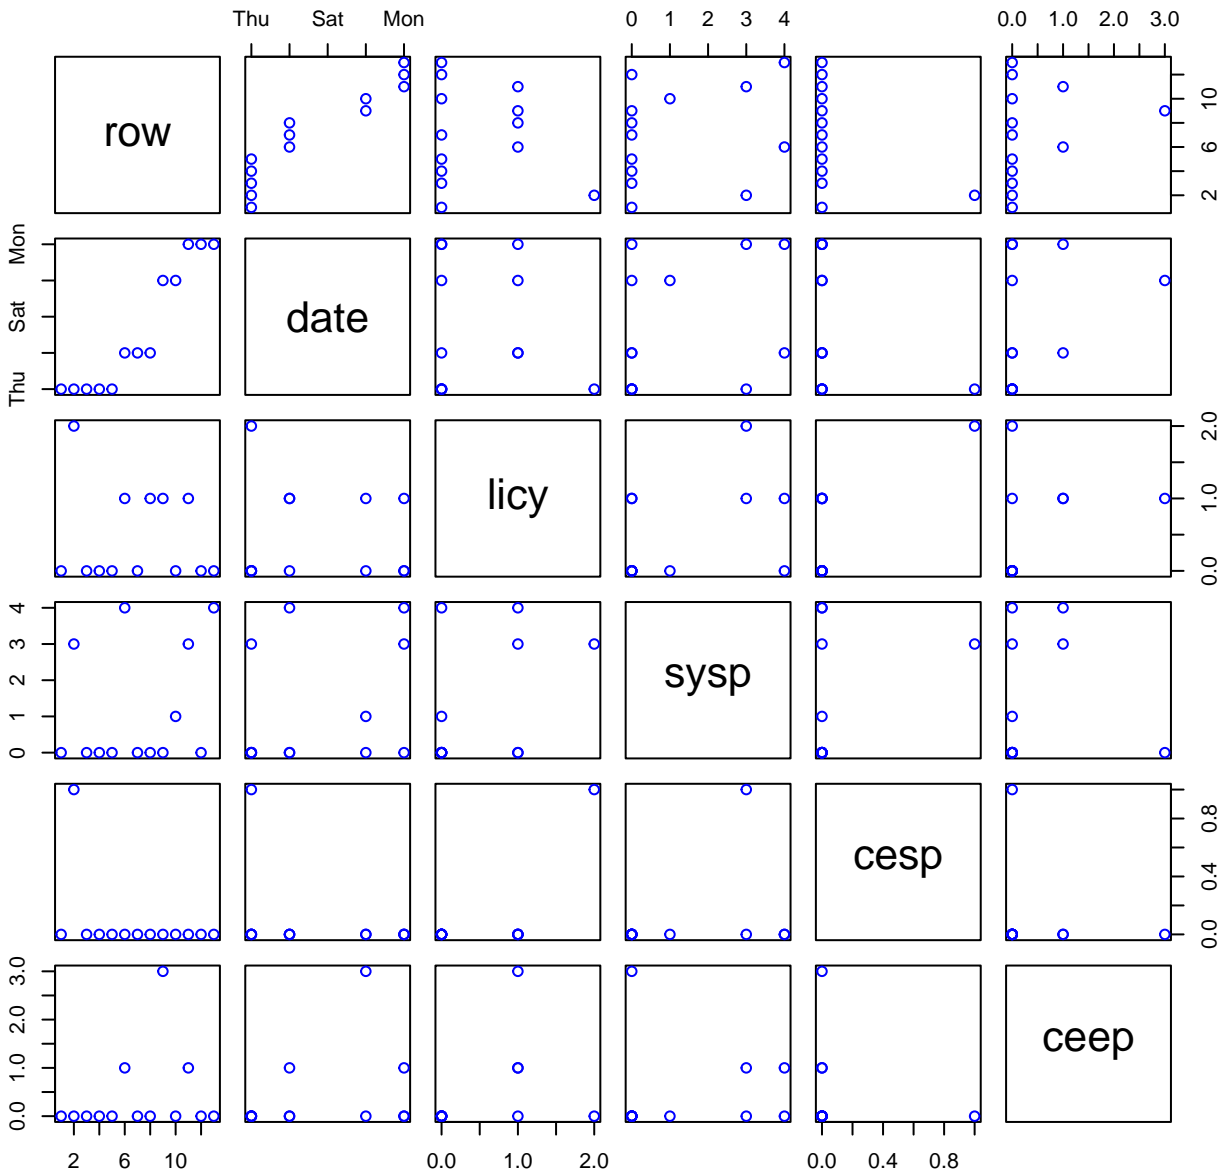

emsp = number of Emerald sp. observed (number)

ceel = number of (Calico) Pennant observed (number)

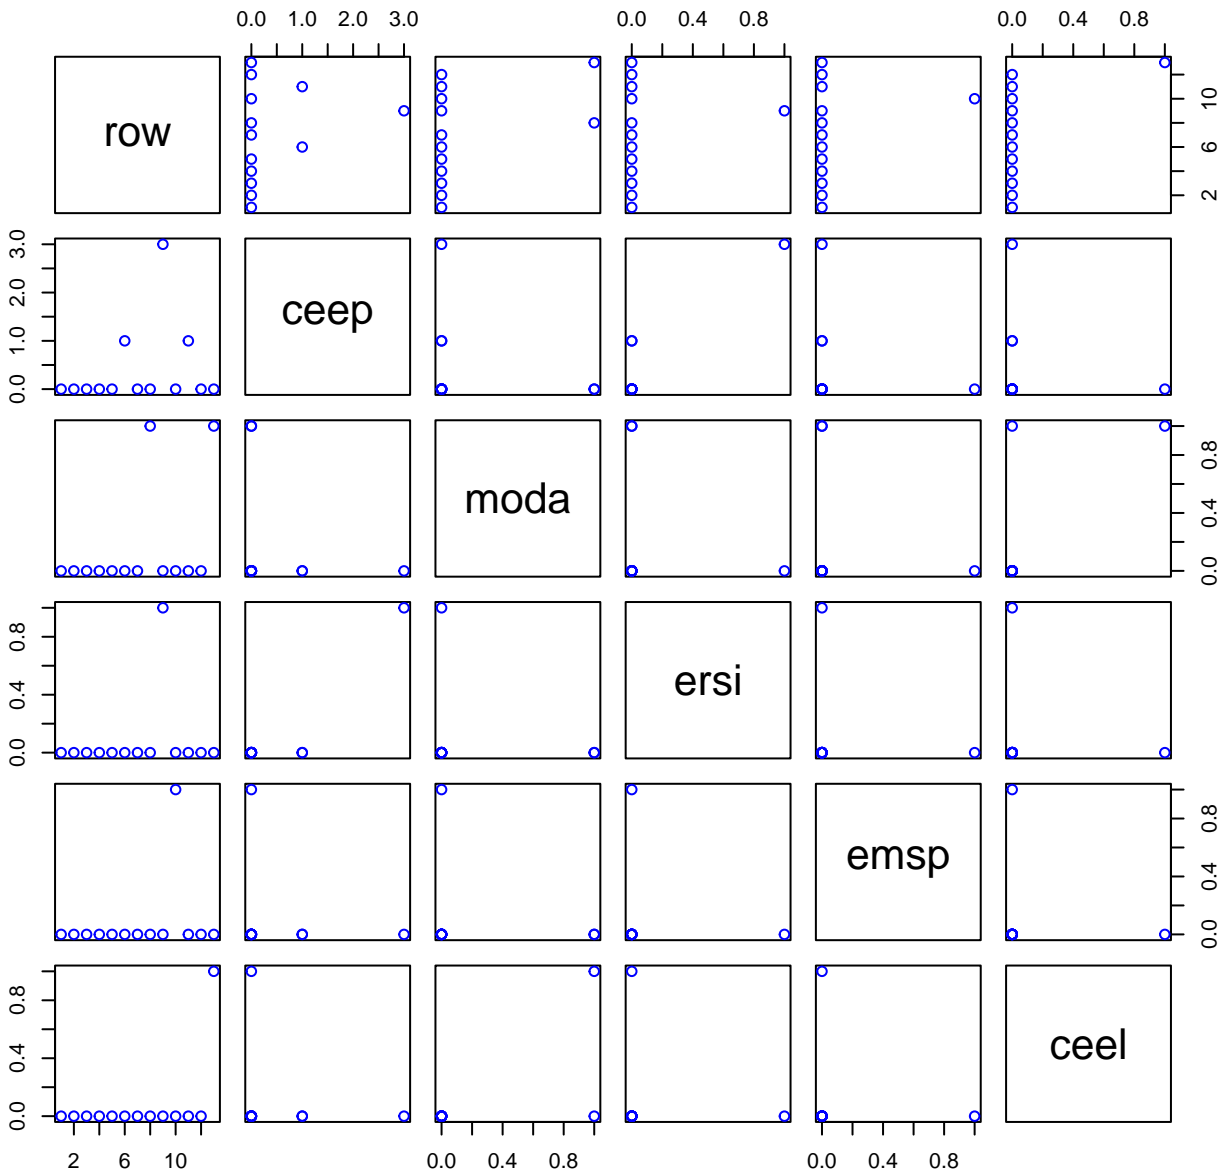

liin = number of Slaty Skimmer observed (number)

Variable	Min	Median	Mean	Max	NAs
date	2015-07-16	2015-07-17	2015-07-17	2015-07-20	0
