Harvard Forest Data Archive HF371-01

Data File:

Name = hf371-01-bacterial-isolates.csv
Description = bacterial isolates
Rows = 363 Columns = 9
MD5 checksum = e74e5623b2bf1c937cca20bc5cfb2360

Variables:

sequence_length = length (in base pairs) of the 16S rRNA sequence
    (number)

```
Variable          Min        Median      Mean        Max         NAs
--------------------------------------------------------------------
sequence_len     0.000      910.000     914.322     1440.000      0
```
