

Spring Phenology - Converting Branch Level Data to Whole Tree data

* Complete this worksheet for each tree on each day of data collection. The highlighted values correspond to data entry fields in the Schoolyard LTER Database.*

Teacher:		School Code:	
Date:		Tree ID:	
		Tree Species Code:	

Enter the following information from the student datasheets.

	# Buds Observed	# Open Buds
Branch A		
Branch B		
Branch C		
Branch D		
Branch E		
TOTAL (Whole Tree)		

Using student data sheets, enter leaf measurement information for each of the observed branches.

	Measurement of the open bud with the largest leaf (cm)
Branch A	
Branch B	
Branch C	
Branch D	
Branch E	

The largest leaf measurement from the table above will be entered into the Schoolyard LTER database.
