Aralia spinosa - 4' plant on north-east shore, Sand Rd., Warwick, R.I.

Pronegansett Rd., Warwick - possible for old Warwick cell in east shore of Atlantic.

Epsomites, Geranium, I peta, Euphorbia?

Splannthera caerulea - from #150 party shelf, Canton's Pk., Apponaug, R.I.

w/ many reg. pond edge stuff.

lots of Myriophyllum - type stuff in Canton's Pk. stuff lived, in water.

NO Salatica - Chara, eulaga "MUSK-GRASS"

Cestanes - sprout @ roadside @ tiny pond SW of Canton's Pk.

Chara pecopta - frequent on sandbank, east shore of southernmost of Three Ponds, Warwick.

Carr Rd., Greenwood, - Woods off part w/ evergreens later Cestanes, Al Birch,

Oaks, Rocky + ridgey.
Antrotostaphlea + Pyrenatherum muticum under power lines no. of Beekman Rd.
No Kingston, R.I. Typical fine grasses, vise, but w. some Asteraceae!
Bluebeard here - big bloom.

Spaxedna canes - in eyg post-grass

Sphenophyllum muticum recent let on east side of K108
(Kingston Rd), R.I. < 1/4 mi. so. of 13%. Also Pyrenatherum muticum

9-10

Aster rhodolphus - w. Cranberry +
Sedanum hispanicum, Cassia, some small lake plants, etc. NE, SE, SW, NW
Shores. Some Aster 2 1/2 tall!

Ledum, Hydrocotyle, Fimbristilis, Rhexia,
Ericameria, J. mil. Scutaria "am" + Nymphoides.
Girldia, Hyper. v. y., etc.

Festuca-type grass in "94 f. + Camphor
Pteridium aquilinum - prob.

U. gilba - same area,肖/Beaverbrook
in Mass. - eastern SW + N show

Wodson Rd. - NE shore tall building.
NE cove w. some Myriophyllum.

Thyrax ca in Garrett's Rd. + Limnanthes
+ pollenum. Scum. + Chara

Aster blakei - NE shore in woods
Rhododendron max + Kalmia latif.

loads in swamp and rocky wood slew
Minutost Rd.

Coropis cod+, Rhexia, Linnaea - show
so. 4 Knoll Rd. by X. cornutum, Scutaria,
Milium, Hydrocotyle, Ludwigia, Sphaerium

Salvatica - 1 plant noted w. 2 Lechmanthea,
so. shore of Rd. east of 94.

w. X. cornutum, Scutaria, J. mil.
Rhexia, Sedanum, Hydrictyle, etc. 10 X. parviflora

and Typha min., etc.

Sagittaria graminea - lives x-t, but
stronger flattened. So shore, wetland.

1. 9c in this year - resident.

Aster blakei - alonng road side, so.

Turtle Pt. mud hole filled w. Errocodon
Rhexia, Scutaria, Nymphoides, J. pal.
Eleocharis sp. Looks good for Policans
but not found.
White Pd. - Polygala cyan - west cave.

Eupator. canesc - 6 plants blooming + 2x veg. @ head west cave; 2 plants blooming @ water table. Good # Eupator. Can. in leaf lemon style. Very few people.

Hypericum in bloom so show.

So. cave of some Polygala cyan.

R. madia.

Collina vilis - patch established inside plant pd. swee of pd. and numerous in yard of house.

No end. Eupator.

White Pd. - color of deep quarly H_2O.

Long Pd.

No end w/ Cota Gerandia, some

Cerastis, only Eupator pd.

Rayed Bidens (W. B.tepant). See next page.

Cedar Swamp Pd. - H_2O too hi.

Hothouse Pd -

U. pump - east cave, part veg.

Kalanchoe sap - 1 plant 3" tall bit.

Eupator. canesc + padlet SE. Polygala cyan. H_2O level & 3" - resident.

Eupator. canesc - few small plants on the path @ entrance east cave.

Veg. only. Cobbly-sandy.

Montepo hyper - Rd 1 plant on path.

from house down to So end. Hothouse Rd.

Also a nice quany blue color to H_2O hour.

but not quite like white Pd.

A. Eupator. leuca - 2 plants @ no. cave.

loads Nymphechia blooming + 4 few veg. leuca

Wash Pd - too much H_2O - dem @ east end.

L. Wash Pd - perfect shelf of sw. shore. but no Salsolae in leuca.

H_2O added x 18. quany H_2O 7/17.

Long Pd. - So end cave.

Eupator. leuca - 181 blooming

W. lycopers, Cucumis fruit. Polygala

Mattaces, Cerastis, Rayed Bidens

tepantle type, Good # Eup. perfect.

no evidence of hybrid, the both blooming

together. Brassia, Semp. much (on a # 4l the ponde today), Myrophium muchly

lycop. commonplace (out there).

Woods all about. 6 fall of Kalmia lat + Rhodo.

Max.

1979-5
7 Sept 1979

Geranium maritima - loada thall in Green Harbor, much just NE of the boat channel and landward of Blackman's Point, Marshfield.

Cycloloma atripeles - Fairly unchallenged and C New Surge Treatment Plant just to W. No vs. except with linear ones < 2" long.

2 sun Brent Rock, write.

1 PUMA & on road w/ other Swallow
C Beer Harb. marsh

Solidago Elliottii - Good # - few lots in roadside brush (files?) marsh @ Wend of Thomas St., Brent Rock, Beginning to bloom.

(?) thrombophila

- Donmeister
9 Sept. —see bird notebook

9 Sept.

Lepidium sativum — call. @ The Gables
N. Situate. Fair # plants, up to 2.5' or 3' tall. W/ some water stream near
var. titules. Both on gravelly sandy sandy
spit on W. side

Pin cherry — good # in the swaths
that cut across m. the swamp (penne-
vanzea). Solidago hybrids (?) here along
entrance rd. Rest not to junipers. Good # lots total

10 Sept '79

Loan Rd. Lakeville

Actinocyathus — 1 blooming on bank @
W. shore.

E. lacuclis! 7 plants blooming
@ base of steep bank @ NW corner
of pond. Collected 2 flowering branches
from 1 plant, the branch had already been
partly removed @ base. Tall & robust
plants, but w/o any leaves & a brain in
apex. Rest of W. end of pond ununsuitable
(true shrubs to H2O edge w/ steep banks)

A few — more today. Next week on north bank
alone W. shore.

Only a few E. perficiens @ the point on
N. shore. Rest of S. Shore + E. Shore
w/ NO lacuclis — H2O level 4' + 6'
perhaps more, from the waves.
Few Asparagus putting many out on rd. to W
end Loon Rd.

1 Petunia argentia in waste ground @
Taunton Hq works bldg @ Elders Pk.
Aster spectabile - few @ Conf. Montgomery St.
and Hill St., W Lakeville, Others @ Peoples
Hill St is good at Rd. Ann. Chastnut -
* few saplings along Hill St., w/ Mortal Honeysuckle

Lilium scoparium - 7 flowering plants on
dry roadside which led to swampy woods
to S end Elders Pk. (see next pg.)

Several E. pseudoacorus along this dirt rd.,
plus Aster eximia

Elders Pk. is way down this year, w/
shelves up to 120 m + - Drew A. desert
due to construction & W end?

Good # + P.C. (many still blooming) @ SW
corner, W brook, & incised river
into U. actaea blooming. Corropoa city
planta often tall @ lead, lobelia dart的女人
ed on S shelf, w/ A.rare U. responsa
old elm in muddy part (close to H2O) —
9-11-79
Aster novae-angliae - small group of
plants @ edge of marshy creek in Abington
along Summer St. Ed. 18, just W of Progress
St. (W! Good # & Soladae, examine.)
good # S. gigantea var. gigantea

** Other plant info is scattered through
the Bird Notebook

9-13 - See Bird notebook

9-15
Lots of Ulvanum luteatum W
on Harris Island, Chatham.

9-16-79
Aster patens - fair # along Ingred
paths @ Plimoth Plantation that goes
W from the NW corner of the Eel
River pond/march.

Aster novae-angliae - good # @
Bay Farm, dancing/Kingston - in
both towns.
9-18-79

Smilax herbacea - 2 robust plants in wooded roadside near window on Rd., Marshfield. Planted about 9 ft. in from end of Hospital Ave. overlooking So. River.

At dusk, marshy area just E of road that connects South Ruin Rd. with 139:

- Fainia
- Mikania

- Late Marsh Ferns

- Faintly purpureus

Good # Arrow Arum, Faint # Sol edge gigantea. Only a quick look here.

Faint of faint # of Sol edge nervosa or sphagnumphilus (?) in swampy woods just before one got with South Ruin Rd. I do not 100% certain; specimen taken.

10-16-79

Few Aster cordifolius. Edge of moist woods behind 23 Towne Way. 176th.

Several Sambucus canad. here; one small plant of Taxus canad. (?) taken.

In the swampy woods, a few Colcbasga which N in disturbed soil of cut. Choke cherry (P. virginiana) - a few along edge of cut w/ poisoning Poison Sumac (some) & Aster ciscico along Clear Echo Lane 176th.

Note: Lantodon autumnalis has been seen in # places in 176th, Ply, Hanover, etc. - I'd say general in Ply. Co. lawns, roadside, disturbed soil.
10-20

The Glades
W1 Evelyn

Asteroid: clue, smooth wintcherry
1 Fews: Baking, datey in and

Genet: 4.21
Bigleaf cods, beyond rocks, rip.

Salix: four-mated, blue, white, felt, below off, dense, hairy.

10-21

Cape Cod landing W1 Evelyn, Wayne

Southern Arrowwood: slick noted
1 Pocket Island - not so recognition.

Moricambe

[Handwritten text not clearly legible]
10-22

Loads of Spirea bush in moist woods along South River St. in Kettlefield, especially between the road and the river. Nice golden yellow color moving up late, hanging down (mostly).

Some seedlings of English Oak scattered along same Rd, E of Telegraph Hill.

Eva in salty marsh SE of Kent Park (end of Texas Rd)

10-24

Aster undulatus - fair # along old dirt Rd, @ W end of "Gov. Window" marshy pond on 139 NE of Cox Corner in 179 Rd.

チェック Halls Brook Cedar bog SE of Blackwater Rd, just W of 3A in Kingston center.

Tilia europaea plants of all sizes & stages of maturity right alongside So. River St., esp. mature S of Telegraph Hill. Collected
N.J: Big Holly @ mile 22.8 (Eustace Pkwy)
But + picnic area is 1.1/2"
Shade 2 belts circumference @
4' above ground = 24.3" Height = 45± feet
Brother's seg is 300 yrs old.

Pine Barrens, w/ Evelyn

Resident Naturalist = Annie Carter

Quite knowledgeable about local flora. Led us to Carly Gress spot
at boardwalk over Sleper Branch

(Possibly a tributary of this Branch) Fruitful
bodies + stilt brown, but Carly less tall
± green. Patch covered 2-3 sq. ft.
Go around W side of Cemetery + church at
Pleasant Hill. To dirt parking lot ca 1/2
No. Walk along wooded road + trail NE.

To boardwalk. Few Salvia officinalis is too.
Over board walk + Egret roosts is very open
sandy spot w/ Primrose carolinian
among mate of Helianthus conspicus
Lythrum maritima and Lycopersicum
common thru open woods.

Shrubs like pine @ Church 7 but more
common elsewhere in same site as pitch.
Took Martha Furnace Rd from Chatsworth Rd. walked on dirt rd past selling E side of Martha Pl. At one wet spot a rabbit crosses the rd. and in a patch of lato of Lycopodium aleppicoides. Some in center of rd. in few centuries autumnale. still blooming in August.

Just N of Jenkins, took River Place Rd. NE ward to West Plains; got lost + ended up S edge of open "test range" area (or range) — filled w/ heather + probably other goodies. Much of West Plains is 5 to stunted pines. S of Fountain Rd and W of Armenia Pl and E of Maria Pl and Fivemile Pl in Plymouth.

11-01

Biking for a while.

Hammond — N. Duxbury Quercus acerina = Tomp. @ Captree (50') plus several saplings + seedlings along Parsonsage St. 100d. between Rte 139 and Webster St. Also maple trees along 139 W of St. W1 Parsonsage.

Quercus acerina — 1 tree in woods 50' from Webster St, where it crosses Green Harbor Rd. Leaves conspicuous green + persistent @ this time.

N end of Cranberry bog reservoir due W of Black Pit. is mostly filled w/ Sweet Gale. Captree tree along path (old RR grade but narrow) w/ hardhack, Vaccinium arter., Alnus, Lyonia ligustrina. others - looks good for radii, etc.

9 wood ducks in w/ few mallards + blackes. Long reservoir due South. 30 ducks; some - what shrubby.

On NE side of marsh @ NE corner of the long reservoir (above). 2 along old dirt rd. in patch of Andropogon Virginicus var. affinis. Solidago uliginosiss.
Eupatorium pilosum - Ambrosia artemisiifolia
@ jct of this dirt rd and the old RR.
Good # Total.

Can't go any farther S on either rd.
Due to water, fence, but can come
up from S end close enough.

* Perfect look at 9 SPWA doe
  thin + indistinct streaks on back +
  rump + u-t. contour.

@ S end of the long reservoir, under
powersline, is late Ambrosia, vio. other,
w/ A. scoparia. Should be good
for ducks, etc., but made WRP brought
me here re.

1 FISP doe.

Swamp N of Carnwell st and W of
Gov. Winthrop pond has some Y. Birds,
but I didn't get into swamp.
Marsh on sw side of the Winthrop Rd
had 2 Snipe.

Big Black Oak @ cor. of Lincoln and Temple St.
No. Duxbury.

Fair # of Am. Chestnut sprouts
in recently cleared patch. E corner
of northern Duxbury (corner of Church
St & Rte 3A). No age adults nearby.
What was this patch like before clearing?

Norway Maple is widely distributed in
field, genl. abundance = uncommon.
1. Estes Woods = swampy, maple, oak, hickory
   opp Marina on W side of Green Hbr. W of Rte 139 and S of 9.

2. Conservation Area @ Nfld. Rec. E of trails to Cherry Hill & Shagbark S Ts.

   **Thuja** europaea
   - common tree
   - saplings usually much bigger than species along N of Sawmill.
   - Hesperis matronalis - Richardson's patch.
   - Red Spruce - Good # along trail to Fugue Hill. Check this - Not Norway?
   - Fraxinus excelsior - on NW side of pond.
   - English Oak, both still green -aved.

   Four trees of **Rhus typhina** - sticky black on the Fugue Hill.

   **Lathyrus japonicus** in marsh edge N of pond.
   - Lycopus americanus - Kelloggswort - lake and patch.

   Path leads to abandoned clearing north at edge of river. Apple tree abandoned.
   - Capt. masonii, *Rhamna cathartica* (fair #).
   - Small grove of *Rhus typhina*.
   - *Viola cucullata*

   Path leads to abandoned clearing nearby at edge. Apple tree abandoned. 4 on escaped. *Lonicera menziesii*, *Rhamna cathartica* (fair #).

   Path leads to abandoned clearing nearby at edge. Apple tree abandoned. 4 on escaped. *Lonicera menziesii*, *Rhamna cathartica* (fair #).

   Small grove of *Rhus typhina*.
   - *Viola cucullata* + maple.
   - *Crepe myrtle* Columnus orb.
   - *Rubus* sp. including 1 0 think is red raspberry.
   - *Urtica dioica* (or S primately) + *Urtica dioica*
   - *Sisyrinchium withersii*. pretty like the...
of playing field. Can make a loop
+ get to cedar grove area.
Top. Honey Locust locally common in most
Solidago, witch grass - 1 patch in swampy
open woods - W 81. rugosa nearby, and
putative hybrids between.

TRSP - 1st of fall

Can't get past Wharf Creek - 1.5 to 2
deep for Bean Boots.

Thought - reason so many Abate
trees are green now - because most
of what's planted here are derived from
hardier cult. varieties?

11-16-79

Extensive stand Scrub Oak - Shumard
N of Pearling Pl. Rd. and W of
Circuit Drive. 17/4. Studdard SF

- Shows on top

- COyA X Rd. S of Bispo Pl. (White Pine)

Walked from gate 5. new Aborn Pl. South
dong dirt boundary rd to Stringer Rd.

- Stiff-leaved Acanthus - sandy

Hemlock view. - locally abundant along
"Andropogon scopo - frequent thicket
eata" 4. var. alba - on 1
shelf of Charge Pl.

Bare area along W side of Maple Springs Rd
is Beech, dwarf Scrub Oak, haws.
promising, but...

3 TUTI in pine oak grove along Maple Spr.
Pl, of land of BCCH.
Corona - late - grade in open

Hedonia - Coral - Bearberry - Vaccinium

barren on N side of South Line Rd.
(= Fly - Washen line), E of Maple Spring Rd.
and W of Little Long Rd. This open
area not shown on top (1972). Collected 4
specimens, all branches from different shrubs
Site in Wins Tranm of Plymouth. Not quite in the E
the side of the trough running N-S.

Checked open barren N of Little Long Rd.

Like D Hedonia - Bearberry - Small Shrub -

Cranes. No Crane.

Collected specimen of one shrub of leucia -
colored clustered berries and paired white
leaves. DI depressus E of the deep trough
in the barren. = Coralberry,

Symphoricarpos orbiculatus

11-18-79

Good # English Aces along Canal

street, Mfld., several are large

size.

11-19

Rock (common) Polygyn - Bear eat on
rock outcrop facing old acre st,
at tip of NW side of pudding hill,

Mfld.

A few elm trees found here - plnt

from tree x plnt @ farm.

Mycetis scopioide - late along channel oasa-

ing Elm st. @ SE end of big cranberry
Reservoir @ E. Montrose village. Also

large gro Liveo water here.

3. Hooded merganser c. 5 end of reservoir

407, 38 Cadwell @ marsh and @ RTE 3

and So. And Rd. 3 MUSYan, too
11-20-79

Lots of Am. Hollies on Holly Hill

W1 E. achillea -

@ 46 Napoleon St.

* Pleasure by double Trumpetone

Hollies, off E. Randall St., w/ flat

Red Spurce - several noted @ ft of Spring St.

Randall St., w/ flat

smalldome (day Randall St.), 1 yea patch

of Lycoth. lucidum in swamp woods

off Randall St., Randall Pk. (Smallone)

has nice flat W/ cedar border. Call

School to get permission. Could not

see big pond at all

at Paddy

Brae, or both sides of Towson Ave,

Spring/Keena Streets (Pemb's) etc.

Woman seq. died. 100+ trees on the hill;

Saw were bleached, others had been bleached and produced minute growth.

Crop in 1 concentrated group of trees, and others seemed unbleached & vigorous,

up to 60' tall and 1-2' DBH.

Many fruit spread out on ground. Almost everywhere there were 3 trees.

These are European Chestnut,

*C. sativa* - leaf bases

rounded or slightly cuneate, most

narrowly cuneate; hirsute at midrib;

Large Fruits. - Ray Angelo
Also are holmies (Pm.) in creny of the yard S of Tupelo, Indian Woods, and others scattered in woods W + S of these streets, but disappear as one goes W + N over Holly Hill. Selma odd this species should be in upland woods - Ask Archie & Hagan re possible planting of these + chestnuts long ago.

Elsewhere on Holly Hill S of Tupelo were found few small Taxus, several Tupelo (Tree) few larger, all began as straggly, contain few swampy thickets W of Hatfield Antiques

T. Canadensis (probably) det. T. Zeni

11-28

Marshfield

Potentilla recta - few noted (by putting stakes brown but base dark green) at moist edge of a nearby depression S of the buildings on S side of RFD. Airport

FISP nearby: 111

Hyacinth - gentianoides - roads in dry skull will along S side of airport runway

Sparganium rubra - fair # S side of men Exem.

PMWA-1

Blackberry tangles prevent access to Gene R marches, etc. along whole length of roadway

Composite - few blooming at mailbox on S side of Rd at 457 South Bear St. except or persistent.
11-30

4 EVER on BK Rd. Bog

12-08

Shagbark type hickory - one on hillside along Porqine White road

on way to farmhouse, Marshfield. Another near S end

of Church St. Bark in strips.
452-92
Cemco
w/ gray primer
