

Harvard Forest Data Archive HF003-08

Data File:

Name = hf003-08-fall-mean-spp.csv

Description = mean fall dates (species)

Rows = 617 Columns = 6

MD5 checksum = 736c325357531af01db0cfa6da464cf3

Variables:

year = year

lc.doy = mean day of year on which 50% of the leaves have changed
color on individuals of this species (nominalDay)

lf.doy = mean day of year on which 50% of the leaves have fallen
from individuals of this species (nominalDay)

sd.lc.doy = standard deviation of mean day of year on which 50% of
the leaves have changed color on individuals of this species
(nominalDay)

sd.lf.doy = standard deviation of mean day of year on which 50% of
the leaves have fallen from individuals of this species (nominalDay)

Variable	Min	Median	Mean	Max	NAs
year	1991.000	2000.000	2001.927	2019.000	0
lc.doy	249.000	280.000	279.655	304.000	12
lf.doy	252.000	289.000	289.640	317.000	3
sd.lc.doy	0.000	4.728	5.565	33.676	18
sd.lf.doy	0.000	5.075	5.979	29.882	8
