

Harvard Forest Data Archive HF034-01

Data File:

Name = hf034-01-streamflow.csv

Description = streamflow data

Rows = 81 Columns = 13

MD5 checksum = 84dc8ec9e8ac13bcelf1a693e4a6ef35

Variables:

flag = location along stream length, identified by the flag number at upper end of study reach, representing a 20-meter stretch of stream (e.g., flag # 640 represents the reach from 620 m to 640 m) above the 0 point on the stream (number)

Variable	Min	Median	Mean	Max	NAs
flag	0.000	400.000	417.284	980.000	0
