

Harvard Forest Data Archive HF048-06

Data File:

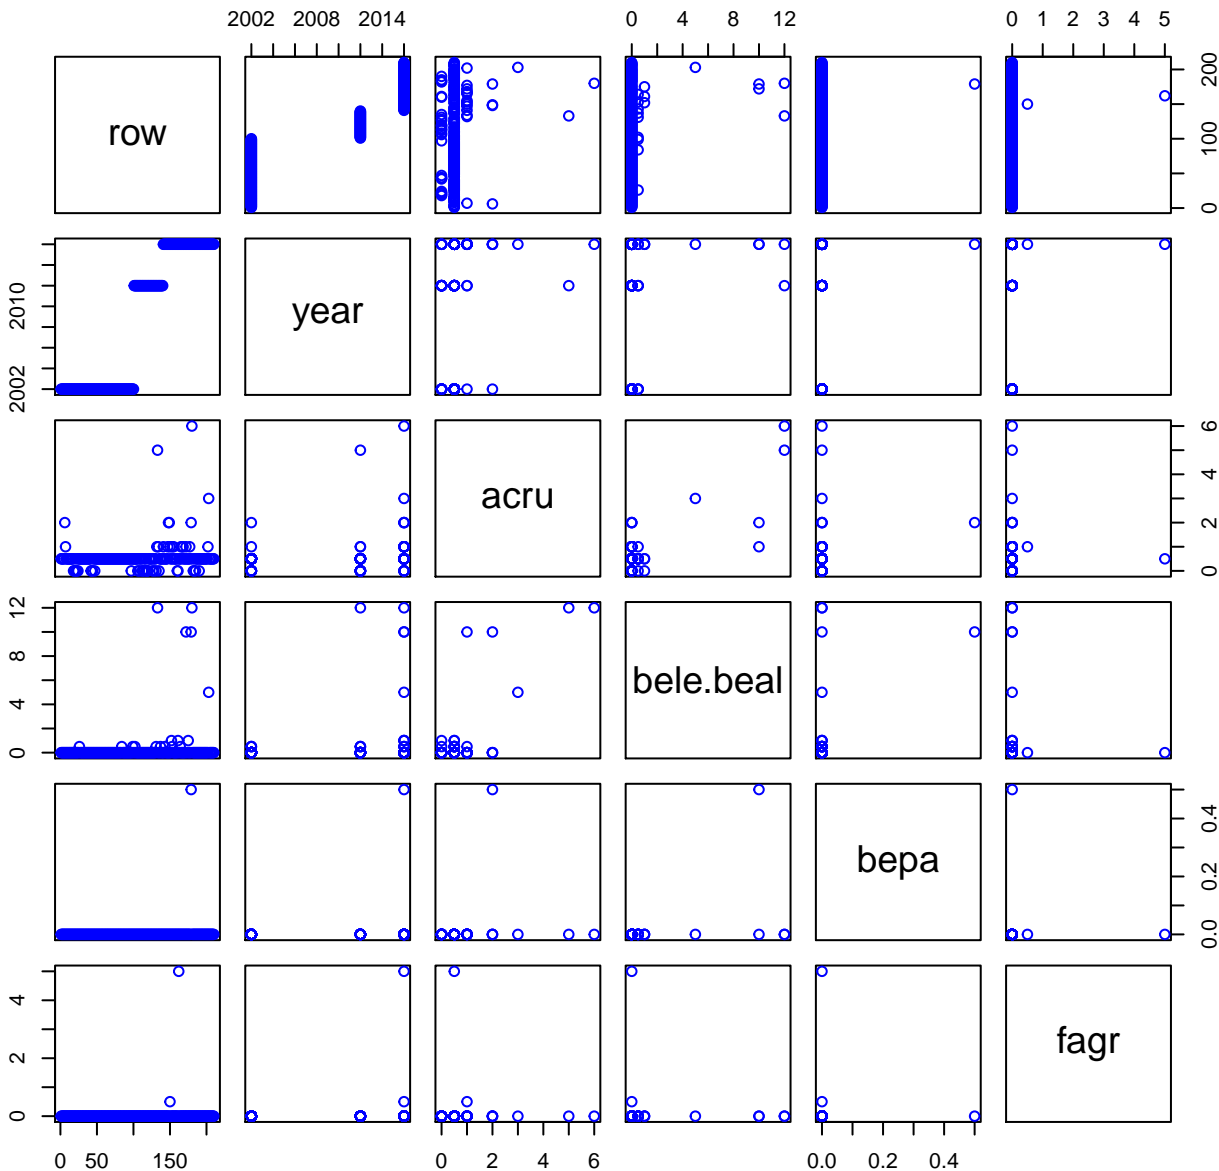

Name = hf048-06-seedling-cover.csv  
Description = seedling cover  
Rows = 210 Columns = 14  
MD5 checksum = 7683e73c4b6a21e0201ff3717c606fce

Variables:

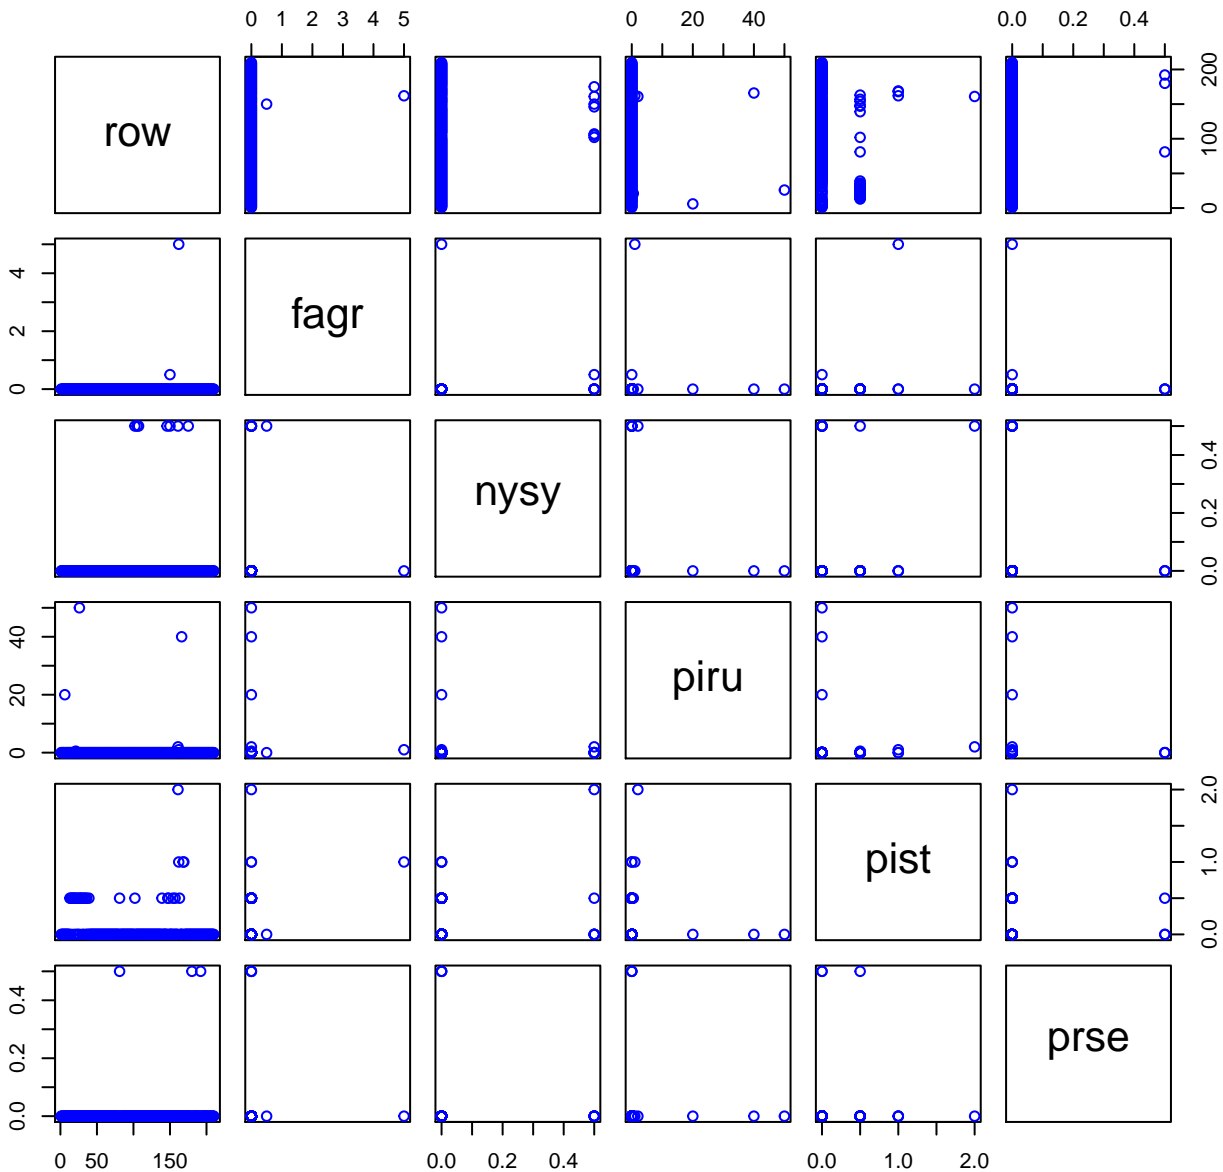

year = year of measurement  
acru = percent cover of *Acer rubrum*. Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)  
bele.beal = percent cover of *Betula lenta* or *Betula alleghaniensis* (difficult to distinguish as seedlings). Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)  
bepa = percent cover of *Betula papyrifera*. Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)  
fagr = percent cover of *Fagus grandifolia*. Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)  
nysy = percent cover of *Nyssa sylvatica*. Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)  
piru = percent cover of *Picea rubens*. Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)  
pist = percent cover of *Pinus strobus*. Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)  
prse = percent cover of *Prunus serotina*. Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)  
quru = percent cover of *Quercus rubra*. Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)  
tsca = percent cover of *Tsuga canadensis*. Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)  
unk = percent cover of unknown species. Cover was recorded to the nearest 1%. A cover % of 0.5% was assigned to species present within a subplot but with less than 1% cover. (dimensionless)
