

Harvard Forest Data Archive HF105-05

Data File:

Name = hf105-05-seed-rain.csv

Description = seed rain 2005-2015

Rows = 1892 Columns = 16

MD5 checksum = 02bfb4e420cf135a85d0e195a5715213

Variables:

date = date of sample

mass = total mass weighed (gram)

env.mass = average mass of small or large envelope (gram)

seeds.mass = mass of seed lot = mass - env.mass (gram)

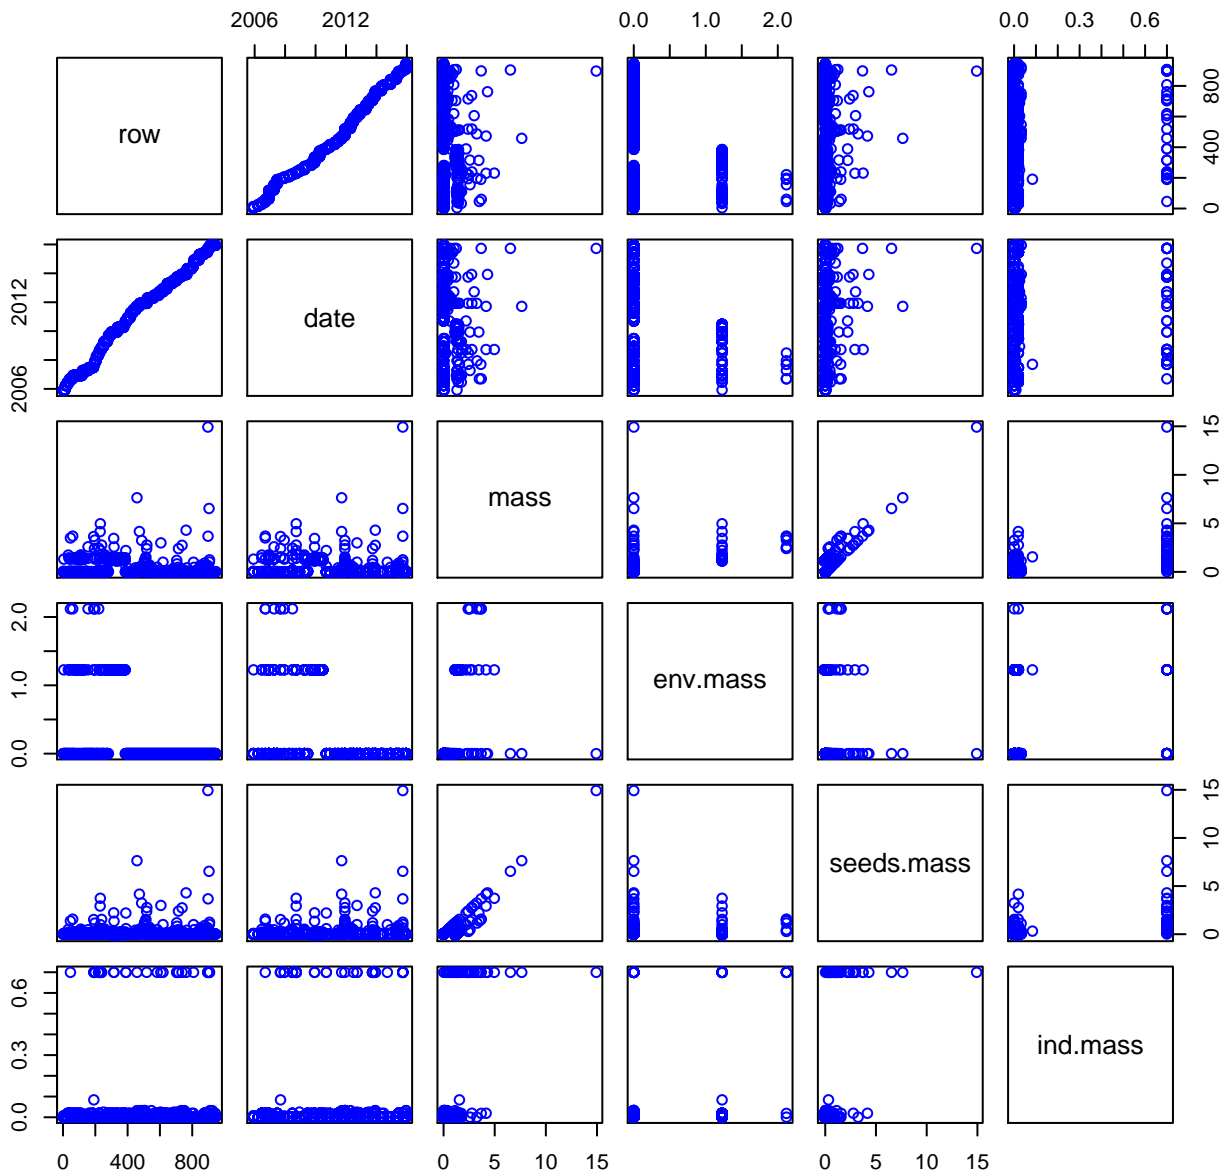

ind.mass = average mass of individual seed of the species (gram)

seed.count = estimated number of seeds = Seed.mass.g/Ind.mass.g,  
rounded to nearest integer (number)

seeds.m2 = estimated number of seeds per square meter = seed.count x  
9.01, rounded to nearest integer (numberPerMeterSquared)

| Variable   | Min        | Median     | Mean       | Max        | NAs |
|------------|------------|------------|------------|------------|-----|
| date       | 2005-12-01 | 2011-10-27 | 2011-04-09 | 2015-12-11 | 0   |
| mass       | 0.000      | 0.018      | 0.407      | 19.240     | 0   |
| env.mass   | 0.000      | 0.000      | 0.232      | 2.120      | 0   |
| seeds.mass | -0.124     | 0.013      | 0.175      | 17.120     | 0   |
| ind.mass   | 0.000      | 0.002      | 0.034      | 0.699      | 9   |
| seed.count | 0.000      | 4.000      | 79.694     | 6894.000   | 0   |
| seeds.m2   | 0.000      | 36.000     | 718.036    | 62111.000  | 0   |
