

Harvard Forest Data Archive HF119-05

Data File:

Name = hf119-05-transect.csv

Description = transect information

Rows = 8 Columns = 6

MD5 checksum = 60874315b7c43cd1e06bec4bbc6fba0b

Variables:

length.m = length of the transect in meters (50 or 100) (meter)

latitude.start = latitude of the starting point of the transect
(degree)

longitude.start = longitude of the starting point of the transect
(degree)

direction = direction the transect runs (degrees west of north;
declination set at 15 degrees) (degree)

Variable	Min	Median	Mean	Max	NAs
length.m	50.000	100.000	93.750	100.000	0
latitude.sta	42.466	42.473	42.473	42.481	1
longitude.st	-72.218	-72.214	-72.215	-72.213	1
direction	24.500	176.000	178.357	332.500	1
